42 NUTS

The FELIX GILLET
[Pronounced Jill-ay]
NURSERY

C. E. PARSONS, Proprietor

1871

1925-26

NEVADA CITY
CALIFORNIA

Fifty-Fourth Annual Catalogue **FELIX GILLET NURSERY**

(Pronounced Jil-lay)

A WORD TO OUR CUSTOMERS

The Felix Gillet Nursery was founded in 1871 by Felix Gillet, a native of France and a barber by trade. From his knowledge of growing conditions in France he felt that the Pacific Coast had wonderful opportunities for nut growing, so set about the importation and dissemination of the fine European varieties of nuts, notably the Mayette walnut, Barcelona Filbert and Combale Chestnut, as well as many other varieties of these species.

Few works on nut culture can be found in which some reference is not made to the notable efforts in this connection of Felix Gillet. BAILEY'S CYCLOPEDIA OF HORTICULTURE (which is to Horticulture, what the Encyclopedia Britannica is to Literature) states "The present walnut industry (California) owes its establishment to the early efforts of Jos. Sexton of Santa Barbara and the late Felix Gillet of Nevada City. The French varieties, such as the Mayette, Franquette, and the like, owe their popularity to the tireless work of the late Gillet in promoting the production of this type of walnut".

The nut industry in Oregon and Washington owes much to his vision and sound advice. The present owner is carrying on Gillet's work and is jealous of the traditions and record of a half century of achievement. He has introduced to the Pacific coast several new varieties of hybrid chestnuts and is at work on several others of great promise at this time.

Any business that has been successfully carried on for more than a half century warrants your patronage and insures your satisfaction.

Our stock is carefully grown, dug and packed under the close supervision of the owner. OUR LOCATION high in the Sierra Nevada Mountains of Northern California, with a soil well adapted to producing thrifty trees and plants with good roots, insures the proper ripening of the wood of nursery trees without frost injury, so common to lower altitudes and latitudes.

READ EVERY WORD WE HAVE WRITTEN ABOUT NUT TREES, IT IS NEWS OF THE FIRST ORDER FOR ALL LAND OWNERS.

WHY THOUGHTFUL FORWARD LOOKING PEOPLE PLANT NUT TREES

- 1st.—They are profitable.
- 2nd.—They are easily cared for and sold.
- 3rd.—A large and growing market easily absorbs all that are produced.
- 4th.—This country does not produce enough to supply the demand, making imports necessary.
- 5th.—It is a clean dignified business with great possibilities.
- 6th.—Enormous quantities of nut meats are used by the confectionery trade. THIS MEANS DEMAND. YOU CAN HELP SUPPLY IT.
- 7th.—More and more are the growers of deciduous fruits confronted with highly competitive markets. With new acreage coming to bearing the managers of cooperatives are gravely concerned as to future prices. They must resort to the highly expensive expediente of national advertising in hopes of inducing the consumer to eat their product. As most deciduous fruits are competing with one another, as well as tropical fruits, such as bananas and pineapples (which are relatively cheap) the consumer will buy that which costs the least, thus bearing down the price of all fruits to the level of the cheapest—or nearly so; high cost advertising to the contrary notwithstanding. No matter how much the skillfully worded \$8000 per page advertisement makes their mouths water, if the price of the fruit advertised is 5c each while bananas are 2 for 5c the prudent buy the latter. In this connection it should be borne in mind that fresh deciduous fruits must be sold when they are ripe. Nuts are marketed more leisurely.

Nut Trees

BARCELONA

DUCHILLY

THE FILBERT OR HAZEL NUT

How many of you who read this realize that this great growing country of ours is now consuming over 30,000,000 pounds of this delicious nut annually? And most all of them imported.

This amounts to about 4 oz. per capita, while a few years back it was only 1 $\frac{1}{4}$ oz. per capita. An impressive percentage increase.

They are not eating more of them because of great advertising campaigns, with slogans such as, "Eventually—Why Not Now". "The Flavor Lasts". "Have You Had Your Iron Today". "The Taste Tells" nor yet because they will aid "Keeping That School-Girl Complexion". Not one cent has the little filbert paid out to advertise itself, yet people are eating it in ever increasing quantities, because they like it. **And that is the best reason for you to plant it.** THE MARKET IS READY. ARE YOU?

Important Facts About the Filbert

SOILS—They will produce more and better nuts on good soil; yet steep and even rocky land will turn out profitable yields. They will do better on soil that is not acid and if you feel that your soil is acid, apply lime about the tree at time of planting (about a trowel-full to each tree) scattered in three foot circle and worked in. Part can be used in soil that goes about the roots. Use either hydrated lime or ground limestone.

MOISTURE—If you supply moisture and ordinary care they will furnish you an income as long as you live and give your children and grand-children good crops as well, for the filbert is a very long lived tree. We have sound and healthy trees on poor soil, that are fifty years old, and records of European plantings show them to be productive beyond the century mark.

DISTANCE—On good soils plant 20 to 25 feet apart; poorer ground 15 to 18 feet.

POLLENIZING—Most all varieties are self-sterile and for good crops must be cross-pollenized. Therefore a mixture of varieties will give the best results. The BARCELONA (best commercial variety) is best pollenized by the varieties marked with an asterisk * opposite each name in descriptive list, several of which should be used in large plantings.

Pollenizing may be done by devoting 11 per cent or 16 2-3 per cent of the planting to pollenizers, or a better way is to plant solid to Barcelona and later on graft in one limb to a pollenizer.

Eleven per cent means every third tree in every third row is a pollenizer. Twenty feet apart takes 12 pollenizers to the acre.

Sixteen and two-thirds per cent means every third tree in every second row is a pollenizer. Twenty feet apart takes 18 pollenizers to the acre.

Good results may be expected with either percentage. We advise planting solid to Barcelona, buying a few trees of pollenizers to use as mother plants from which to take grafts for top grafting one limb of the Barcelona. Higher yields per acre will result from this method.

YIELDS—Good yields will result from the bush form allowing four or five shoots to grow from the root crown. Maximum yields will result from training to tree form, with single stem branching at 15 to 24 inches from ground or higher as preferred. Careful disbudding of sucker buds at planting time and removal of suckers as they may appear for a few years will allow branches to make nice shaped trees.

Yields of 1000 to 2000 lbs. and even more per acre may be expected. These are conservative figures based on actual yields here at 2600 feet elevation in Sierra Nevada Mountains where frost and rain damage the catkins. Lower elevations can expect maximum crops. The BARCELONA has borne paying crops in each of the twelve years we have observed it on these grounds.

FILBERTS

XXXX XXX XX X

Note the Root System of Our Filbert Plants.

PRICES FOR GENUINE LAYERED PLANTS

(Except as Noted)

		Each	10	100	1000
XXXX	Very heavy roots, 2 to 4 feet	\$1.00	\$7.50	\$60.00	\$550.00
XXX	Heavy roots, 2 to 4 feet	.75	6.50	50.00	450.00
XX	Medium roots, 2 to 3 feet	.65	5.50	40.00	350.00
X	Lighter roots, 1 to 2 feet	.45	3.50	25.00	200.00

5 at 10 rate, 30 or more at 100 rate, 300 or more 1000 rate. We grade filberts by root development as they make roots disproportionate to top growth in nursery. Heights given are only approximate. The same development is shown the first year in orchard.

BARCELONA—Recognized everywhere as the best commercial variety; introduced and named by us. Our plants are therefore genuine, being direct from the original mother tree. Its value, especially for the grower of market nuts, lies in its heavy yield, large size, good appearance, strong growth and disease resistance. Furthermore the nuts are not retained in the husk as are some of the finest varieties. They all drop to the ground over a period of three weeks. Size large, 1 inch broad by $\frac{3}{4}$ ths inch thick. Round or nearly so, color brown-bright and handsome. Borne singly and in clusters of two to six. (Read important footnote).

***DUCHILLY**. Large, over 1 inch long by $\frac{3}{4}$ inch broad, flattened. Excellent quality, good bearer. Brings five cents a pound premium.

KENTISH COB. Identical with DuChilly except in growth and has a greater abundance of catkins. Bears well without cross-pollination.

BRUNSWICK. Nearly identical with DuChilly.

***DAVIANA**. Nut large, roundish oblong, excellent quality. One of the best pollenizers for Barcelona.

***DES ANGLAIS**. Nearly identical with Daviana.

***MONTEBELLO**. Reported from Oregon as good pollenizer for Barcelona.

***WHITE AVELINE**. Medium size, fair bearer. Quality very high.

***GROSS RONDE**. Nearly identical with White Aveline.

***RED AVELINE**. Medium size, fair bearer. Quality very high.

***PURPLE LEAF AVELINE**. This is one of the most beautiful ornamentals and is a good bearer of delicious nuts. The leaves are a deep rich purple in the spring changing to a bronze purple and later to greenish purple. As a lawn tree trained to a single stem they are beautiful. Nuts borne in clusters of two to eight.

This tree will give a distinction to your place. Height when full grown, 12 feet.

Does best in part shade. \$1.25-\$1.50 each.

NOCE LUNGHE. The largest of all. Over 1 inch long by $\frac{7}{8}$ inch wide and $2\frac{3}{4}$ inches in circumference. Good quality, good bearer. Sold only with other varieties.

***GIANTE DE HALLES.** Large, round pointed on end. Good bearer. Good pollenizer for Barcelona. Sold only with Barcelona.

EMPEROR. Medium size, good bearer.

***IMPERATRICE EUGENIE.** Good size and quality.

IMPERIAL. THE VARIETY WITH A GREAT FUTURE. Large, good quality. The handsomest of all. Heavy bearer, strong grower. Well rooted plants. \$1.50 each. Smaller \$1.00 each.

*These varieties will pollenize Barcelona and will be sold only in connection with Barcelona.

N. B. Important. A nut, sometimes two, in some clusters of all filberts no matter what variety will always be empty. Nuts without kernel always stick to husk and can be easily eliminated at harvest. The reason is this: all tree fruits whether apple, pear, peach, plum or nuts never set every blossom. In the case of pome and other fruits borne singly the un-pollinated fruits drop off soon after blossoming. With nuts that are borne in clusters like the filbert and chestnut the whole cluster is carried on until harvest resulting in some empty nuts or in case of chestnuts-burrs. This will explain why trees bearing very heavy crops will always have some blanks.

FOR SUCCESS WITH THE FILBERT UNDER CALIFORNIA CONDITIONS

You Must

- buy our GENUINE LAYERED BARCELONA TREES.
- Buy some its pollinating varieties.
- prepare your ground well.
- dig good holes 2x2 feet.
- Use 1 lb. fine bone meal to each tree, mixed well with top soil in hole and about the roots.
- Apply lime to soil if it is acid.
- shade the stem of young trees, either with regular protectors (see page ?) or otherwise.
- irrigate and cultivate regularly.
- plant as early in spring as possible.
- or if wise, will plant a cover crop, suitable to your local conditions. It should be planted when you plant the trees. Heavy production of any fruit is obtained only in well fertilized soils.

You Do Not Need To

- use your best land.
- prune every year.
- spray for any pest.
- fear disease.
- fear that rain will spoil the crop.
- fear frost.
- fear over-production.
- expect damage from rabbits or gophers.
- thin the crop—prop the limbs or climb ladders to get the nuts.
- buy trays, shipping boxes, or any expensive packing equipment.
- bleach or artificially prepare the crop for market.

La France

Giant Everbearing Red Raspberry

Big, Rich, Sweet Juicy Berries from June Until November

	Each	10	100
Sucker plants	\$.35	\$3.00	\$25.00

This new Raspberry has been thoroughly tested in various parts of the country. So far it has proven to be all the originators claim for it.

The bush is a remarkable grower, often reaching a height of eight feet.

The berries are firm, much larger than other raspberries; richly delicious in flavor; the late crops are heavier than the earlier, and the size of the berries is the same for early to late. The berries are born in long clusters where throughout the season may be seen buds, blooms, green berries, and ripe fruit in great abundance.

The two most striking characteristics of La France are the enormous size of the berries and the extreme length of the bearing season. A raspberry from which one may gather large crops of berries for Thanksgiving and even later is beyond question an extremely valuable plant to have in the home garden.

THE NUT TREES

Walnuts

The walnut industry is on a sound basis and if you have land that will produce this nut, plant it for steady income. For shade around the home it is unsurpassed. The crop from such trees will pay your taxes.

Grafted on two year Northern California Black roots.

	Each	10	100
6 to 8 ft.	\$1.75	\$15.00	\$125.00
4 to 6 ft.	1.50	12.50	100.00
3 to 4 ft.	1.25	10.00	75.00

VROOMAN FRANQUETTE. Very hardy, late blooming. Very large handsome nut of extra fine quality, commanding 5 cents per pound premium.

SAN JOSE MAYETTE. Hardy, late blooming, blight resisting French variety. Nut very large, round and smooth; light attractive color. Meat light color and high quality. Bears young. Will pollenate Franquette and should be planted with it.

EUREKA. Large, smooth, handsome nut of the finest quality. Not as hardy as the above varieties.

PAYNE or Payne's Seedling. Large and good quality. Said to be heavy bearer. Not as hardy as Franquette and S. J. Mayette.

Seedlings of Franquette and Mayette

Some growers are planting these for stocks on which to graft later, calling them the WHITE WALNUT. They will produce fine nuts of themselves without grafting and for shade trees will do as well as grafted trees. Fine for avenue planting.

Drake's Seedling. No Plus Ultra.

Nonpareil. Texas Prufifie. I. X. L.

Beechnuts

AMERICAN. Makes handsome shade or ornamental tree. Does best in rather loose dry soil. Shade the young tree until well established. 1½ ft. plants 25c each. \$2.00 per 10.

Butternuts

Juglans cinerea. The good old butternut so many of us remember gathering in our youth. 1½|2 ft. trees 35c; \$3.00 per 10.

Hickory Nuts

SHAGBARK. The sweetest nuts of all. Makes stately shade tree. Small plants 25c each. \$1.50 per 10.

Pistachio

The rich highly flavored nut used in fancy confectionery. Kernel is green. Favors a hot arid climate, though somewhat harder than the fig or olive. Seedling trees 2|3 ft. \$1.00 each.

Pine Nuts

Though not usually classed as nuts the seed of the following are edible and very tasty and much enjoyed by some. The trees are highly ornamental and should be more widely planted.

Pinus lambertiana. SUGAR PINE. Probably the most admired pine, especially when seen with its foot long cones pendant from tips of the horizontal branches. Has the largest cones of any pine and they are full of edible seed about the size of a large bean. 1|1½ in cans and balled \$1.50 each. Seed of these \$1.50 a lb.

Pinus sabina. GRAY OR DIGGER PINE. Handsome light green foliage. Cones very large and full of large seed about size of an olive pit. Fine flavor. Will grow in driest soil. 1½ ft. in cans \$2.00 each. Bears cones when quite young.

Scions of Walnuts, Chestnuts, Filberts

WALNUTS. Vrooman Franquette, Mayette, San Jose Mayette, Eureka, Payne. 100 or more 3½c per scion of 2 buds. Small lots 5c. per scion.

Mammoth, Treyve, Chaberte, Willson Wonder, Alpine, 7c per scion.

FILBERTS. Barcelona, DuChilly, Kentish Cob, Daviana, Red and White Aveline, 5 cents per foot.

Giant de Halles, Imperial, Noce Lunghe, Emperor and twenty other scarce varieties. 10 cents per foot.

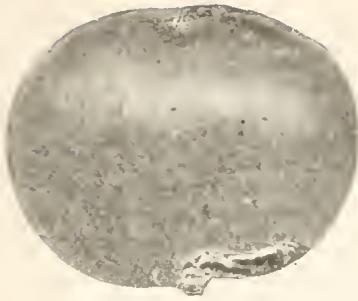

CHESTNUTS. Quercy, Nouzillard, Rochester, 5c per scion.

Large American Sweet, 10c per scion.

Parsons' American Sweet, 25c per scion. This is a very high quality sweet chestnut. Nearly equal to native American sweet. Nuts medium size, bears well. Finest for home use, but as many of the hulls split it is not suitable for commerce.

We can furnish scions of Fruit Trees.

OWING TO TIME TAKEN IN CUTTING AND PACKING SMALL ORDERS OF SCIONS NO ORDER LESS THAN \$1.00 CAN BE ACCEPTED. PACKING IS INCLUDED IN ABOVE PRICES.

Chestnuts

Chestnuts should be more extensively planted, both in orchard form and as door-yard, street and avenue shade trees.

For shading the home grounds no tree surpasses the chestnut in beauty and profit. A door-yard tree in this county yields its owner enough to pay the taxes on his home. This year this single tree netted more than \$60.00 at wholesale prices.

The chestnut is never damaged by late spring frosts as it blooms from late May to July. Harvest season from September to November. A good market awaits you for all you can grow. Pacific Coast markets have to import chestnuts from Italy in order to meet the demand. This is a sad commentary on the acumen of California growers who plant all kinds of fruits to ship 3000 miles at their own risk to Eastern markets in competition with Eastern growers.

Our grafted chestnuts bear very young; often the first year set out. Growth is as fast as apple trees and they come to good bearing long before many varieties of apples. The assortment we offer comprises the choicest varieties we have been able to discover and are a revelation to those who have not seen them. The Fuller-Progress—Large American Sweet are exceptionally fine quality and approach the small native American Sweet in their fine flavor, while their size is three to five times larger.

The individual cost of grafted chestnut trees of the kinds we offer is high, but the per acre cost is very low. For instance: Chestnuts to do their best must have lots of room so that 50 or 60 feet apart is the proper distance. At 60 feet it requires but 12 trees to the acre or \$30.00 for the trees—only 12 holes to stake and dig and plant. An acre of peaches, pears or plums at usual distance of 20 feet requires 100 trees planted on the square. At present prices the trees alone will cost at least \$70.00 for No. 1 stock, besides the added cost of laying out and digging and planting 100 trees.

OUR STOCK OF CHESTNUT TREES IS DECIDEDLY LIMITED. YOU MUST PLACE ORDER NOW OR YOU ARE LIKELY TO BE DISAPPOINTED.

Our pamphlet dealing with the chestnut cost 10 cents in stamps.

GRAFTED TREES

One Year on Two Year Roots.

	Each	10
1 1/16 and up	\$3.00	\$27.50
9 1/16 to 11 1/16	2.75	25.00
7 1/16 to 9 1/16	2.50	22.50
3 1/8 to 7 1/16	2.25	20.00
1 1/4 to 3 1/8	2.00	17.50

We grade chestnuts by caliper as some varieties make a short stocky growth. FULLER. A hybrid sweet of the finest quality. Medium size. Mid-season. This variety can be kept in fine eating condition until spring. Nuts fall free from burr.

LARGE AMERICAN SWEET. Five times the size of native American and nearly as good quality. Matures very early, thus bringing top prices. A good bearer, strong grower. Nuts fall free from burr. Very attractive in form and color. HARRY. Very large, very early, uniform in size. Strong growth. Quality good. A time tested variety bringing best price.

PROGRESS. Medium size. High quality. Handsome appearance. Very prolific, setting nuts in nursery row. This is a hybrid sweet of such appearance and quality as to satisfy the highest class trade.

QUERCY. A French Marron of large size. The handsomest nut we have. Very dark rich glossy brown. A very young and heavy producer of uniform sized nuts. Matures late and is in prime condition for the holiday trade.

SEEDLING CHESTNUT TREES

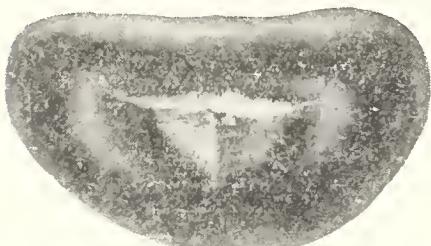

Seed for these trees was selected from grafted trees. They will bear nuts of good size and quality. Seedling trees come to bearing in five or six years, sometimes earlier.

	Each	10 or more
11 1/16 and up	\$1.50	\$1.35
9 1/16 to 11 1/16	1.35	1.25
7 1/16 to 9 1/16	1.25	1.15
3 1/8 to 7 1/16	1.00	.75
1 1/4 to 3 1/875	.65

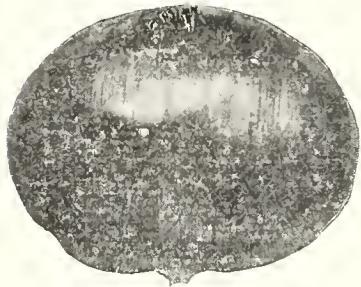

Italian or Spanish.

French Marron.

INTRODUCING THE "COLOSSAL" CHESTNUT

"Colossal" Top and Side View

Ordinary Large Chestnut

Mr. Chas. E. Parsons,
Felix Gillet Nursery.

Dear Mr. Parsons.

The sample of the new variety of Chestnut that you developed, and asked me to give it a name, has been received. For size and appearance it surely takes the cake. It is the largest chestnut I ever saw. I made some weighings, and by dumping them on the scales at random, they went sixteen to the pound, and by picking out the larger ones, it only took eleven to weigh a pound. I don't know whether to give you the credit of being a plant genius, or whether it is due to the wonderful soil and climate of Nevada County to produce such nuts. Anyway they are prize takers, and I will have to decline the honor of giving them a name, as I can't think of a word big enough to do them justice. Very truly yours,

D. F. NORTON, Horticultural Commissioner.

APPEARANCE. Handsome and tempting. A bright brown in color. All of regular shape. A chestnut that will appeal to the highest class trade.

QUALITY. Texture of kernel fine, very sweet, though not as sweet as Fuller and Progress and Large American Sweet. Pellicle rather thick, but not astringent and separates easily from kernel.

YIELD. So far, it bears as heavily as other good bearing varieties at same age. Burrs carry two nuts both uniform. Nuts drop free of burr; a tremendous advantage over many kinds that do not open burr sufficiently for nuts to drop and so have to be husked out.

SEASON. Early. About September 25th to October 5th. All the nuts fall at about the same time. Another advantage. The first chestnuts in the market command the highest prices. Altogether this is a most valuable acquisition and should prove a great money-maker.

To enable everyone to see this wonderful nut and test it under their conditions at lowest cost we have decided to offer * seed as long as our supply lasts at

5 NUTS FOR \$1.00 POSTPAID WITH PLANTING INSTRUCTIONS. No order for less than \$1.00 and not more than 10 nuts to each customer.

*Chestnut seed re-produce themselves very close.

NO GRAFTED TREES ARE AVAILABLE THIS SEASON, BUT WILL BE FOR DELIVERY FALL OF 1926. WE WILL BOOK ORDERS NOW FOR DELIVERY FALL 1926 AT \$3.00 each, filling same in strict rotation, with the larger trees first. Catalog price next season will be \$3.50 each.

(Webster's Dictionary: COLOSSAL., Of enormous size, gigantic, huge). Webster's definition so perfectly describes this new variety that we have adopted the word COLOSSAL as a fitting name. The engraving shows its size compared with ordinary large chestnuts.

Having originated here in the snow-belt of the Sierra Nevada Mountains of Northern California, latitude 39; elevation 2600 feet, it should prove hardy everywhere.

This grand new variety is not only extraordinarily large but it is of fine quality and will be in great demand from the fancy trade at fancy prices. ITS OUTSTANDING POINTS ARE—

SIZE—Actual weights show:
7/9ths of crop run 16 nuts to the pound.
2/9ths of crop run 22 nuts to the pound.
Average 17 nuts to the pound.
Selected nuts run 8 nuts to the pound.

We submitted grab samples for comment to the Horticultural Commissioner of Nevada County, Mr. D. F. Norton, whose letter follows. Inasmuch as Mr. Norton is, by virtue of his office, Sealer of Weights and Measures, no question will arise as to accuracy of the scales on which these nuts were weighed.

Grass Valley, Cal., Oct. 14, 1925.

Fruit Trees and Vines

Apple

One Year

	Each	10	100
4 to 6 ft.	\$.60	\$5.00	\$45.00

Bartlett, Beurre Bosc, Beurre d'Anjou, Comice, Easter Beurre, Winter Nelis.

Persimmons

The Japanese Persimmon adds a touch to the home orchard that is out of the ordinary and the large, luscious fruits, ripening after the fall frosts have come, offer a fitting close to the deciduous fruit season. It will succeed almost anywhere in California.

Hachiya. Large oblong, conical; skin dark bright red; flesh yellow, with dark streaks; few seeds; astringent until ripe; of highest flavor. One of the best of the large Japanese varieties.

Quince

Pineapple. Excellent quality. Strong trees. 75c each.

Grapes

Table, Raisin and Wine Varieties

	Each	10	100	1000
No. 1	\$.25	\$1.50	\$7.50	\$50.00

Alicante Bouschet, Muscat, Flame Tokay, Thompson Seedless, Mission, Rose of Peru, Carignain, Malaga, Zinfandel.

NEW VARIETIES

CASERNO-NOIR. A rare variety. Black, oval, loose bunch. Berry large, sweet, crackling. Very fine. Ripens mid-season.

Three year vines 50 cents.

MARAVILLE DE MALAGA. A fine late grape with deep red color. Large loose bunches. 25c each.

EARLY MUSCAT. A month earlier than common Muscat, far finer flavor. Bunches compact, berries large. Heavy bearer. Just the grape for sections with early autumn frosts, 50c each.

Ornamental Trees and Shrubs

"He that planteth a tree is the servant of God,
He provideth a kindness for many generations,
And faces he hath not seen shall bless him."—Van Dyke

DECIDUOUS SHRUBS

For their flowers, foliage and winter effects, no other class of woody plants equal deciduous shrubs. By using the taller sorts as back ground and the lower growing kinds as fillers and borders, charming effects are produced. Always prune spring flowering shrubs after their bloom. Otherwise much of their beauty is lost.

Ceanothus

C. Integerrimus. CALIFORNIA WILD LILAC. (S) 20 ft. Flowers white. One of our fine native plants. 1½ to 2 ft. 50c each; \$4.00 per 10.

Cornus. Dogwood

C. Nuttallii. PACIFIC COAST DOGWOOD. Splendid shrub for shady places. Flowers large and profuse. The red seed add to its fall beauty when foliage develops its rich red hues. 35c, 50c and 75c each.

Corylus. Filbert

C. maxima purpurea. PURPLE-LEAVED FILBERT. Large shrub with large, round leaves, intensely dark, bronzy purple in spring, becoming greenish toward fall. Very distinct even among other purple-leaved trees and shrubs. \$1.50, \$1.00 and 75c each.

Cydonia. Quince

C. japonica. SCARLET QUINCE. 8 ft. An old favorite. Flowers brilliant scarlet. Makes an impassable and beautiful flowering hedge. 1 ft. 35c each; 2 ½ ft. 75c each.

Diervilla. Weigela

Desirable free-flowering shrubs. Trumpet-shaped flowers showing a profusion of bloom that is almost unequalled. Their striking foliage contrasts finely with other shrubs; for borders they are very effective. Prune after flowering in the summer. 1 to 1½ ft. 35c, \$3.00 per 10.

D. florida (Weigela rosea). 6 ft. An old favorite and probably still the most popular. Flowers pink, large and borne in utmost profusion.

D. hendersoni. Growth upright and compact. Flowers deep rose.

Deutzia

Beautiful, free blooming, shrubs. Bell-shaped flowers, spring and early summer. Should be more widely planted in California for their gorgeous color effects in the garden and shrubbery. 1 year, all varieties 75c each; \$6.00 per 10.

D. fortunei. 6 ft. Handsome hybrid of strong growth. Flowers are large, single and pure white.

D. gracilis. 3 ft. One of our daintiest and most graceful flowering shrubs. Branches slender and arching, with profusion of small, beautifully formed flowers. Altogether a most charming plant.

D. "Pride of Rochester". Tall growing. Flowers large and double; white, slightly tinged pink.

D. scabra plena (D. crenata rosea plena) 6 ft. Growth like preceding; leaves lighter green. Flowers double; white, tinged rose outside.

Desmodium

D. ciliatum. A shrub with graceful, slender branches; oval, clover-like leaves, and a profusion of pea-shaped flowers. Bare root, 25c each.

Exochorda

E. grandiflora. PEARL BUSH. China. 10 ft. Large shrub, blooming early in spring, when entire plant is covered with purest white blossoms. The finest white flowering shrub of early spring. 35c each; \$3.00 per 10.

Forsythia. Golden Bell

F. suspensa. China. 8 ft. Rather tall but with very drooping branches. Can be trained over arbors. 50c each. Variegated 75c each.

F. vitidissmis. Of a straggling growth with long, deep green, smooth leaves; blooms just as the leaves unfold with masses of golden bell-like flowers. 50c each.

Amygdalus. Pink Flowering Almond. 6 ft. The beauty of this shrub in the spring is not soon forgotten. Flowers are double and cover the branches. 2 to 3 ft. 75c.

Hibiscus. Althea. Rose of Sharon

The brightest and freest blooming shrub in garden during July, August, September. Large showy flowers, which are developed by heavy pruning during winter.

Lady Stanley Double light pink with dark red center.

Totus Albus Large single white about size of Cherokee rose. Very free blooming. Bare roots, 12 to 18 inches. 50c each; \$4.00 per 10.

Hydrangea

These ornamental, large leaved plants with enormous beautifully colored flowers are worthy of the most extensive cultivation. In the interior valleys they require partial shade, and must be well supplied with moisture to bring out their many fine points.

H. arborescens sterilis. HILLS OF SNOW 10 ft. Native American shrub, considered in the East to be the best acquisition in years. Cymes shaped like our common pink variety, but snow white. Blooms from early to late summer. Of great value for sections too cold for the hortensis types. Bare root, 2 ft. 75c each; 18 to 24 inches 50c each; \$4.00 per 10.

H. hortensis 8 ft. The most common form in California. Large leaves, practically an evergreen; pink flowers in immense cymes one foot in diameter. Blooms till summer. Potted 50c.

H. Paniculata Grandiflora. Fine tall hedges, or if planted in rich soil and severely pruned every spring before the leaf buds open, will get to be very dense dwarf clumps of compact form, wonderfully attractive when laden with their massive white plumes. Large beds, kept at a uniform development, are extremely showy: first snowy white, then pink, then reddish bronze and green. August till autumn. Planted rather well back in the intervals between other shrubs, the projecting flower wands arching from the ground are extremely conspicuous and effective.

18 to 24 in.—50c each; \$4.50 per 10.

12 to 18 in.—40c each; \$3.50 per 10.

Koelreuteria Paniculata Varnish Tree

An ornamental tree from China. Forms a flat, spreading head, has large pinnate leaves and in July produces immense panicles of orange-yellow flowers. Desirable for its bloom and Autumnal coloring. 1 to 1½ feet, 35c each.

Lagerstroemia Crape Myrtle

Strong growing shrubs, for almost any soil condition, should have a place in every garden. Leaves a bright green, retaining their fresh color all summer; flowers produced in large panicles at ends of branches during the entire season. 1½ to 2 ft. \$1.25.

L. indica purpurea. 20 ft. Shrub or small tree, very smooth bark. Flowers purple.

Lonicera. Honeysuckle

L. tatarica. TARTARIAN HONEYSUCKLE. 10 ft. Compact, much-branched, leafy shrub of pleasing appearance. Bears small, pink flowers of typical Honeysuckle form. Not at all climbing. Also white, 1 to 1½ ft. 35c each; \$3.00 per 10.

Philadelphus. The Mock Oranges

A shrub, with large, handsome foliage and white showy flowers in May and June. Very fragrant with odor of orange blossoms. Well adapted to shrubberies, thriving in any well drained soil. Pruning should be done after flowering.

Mont. Blane. Fragrant free blooming on slender upright branches. Tall growing. 1 to 1½ ft. 35c each; \$3.00 per 10.

Prunus

P. Persica. Pink flowering Peach. Very double 2 to 3 ft. 75c.

P. Pissardi. Purple leaf Plum. Very desirable. Holds its color all the season. Fruit purple and makes good jam. 4 to 6 ft. \$1.00 each.

P. Pissardi. Meseri. Foliage not so purple as preceding, but flowers are fully double, deep pink. Very fine. 4 to 6 ft. \$1.00 each.

P. Pissardi. Hessei. Foliage, narrow reddish, with yellow border. A shrub, 4 to 6 ft. \$1.00 each.

Spiraea. Spirea

Medium-sized shrubs of free blooming habit, varying in appearance, color of flowers and manner of blooming. All have very small flowers borne in compact clusters of different forms. Do well in any good garden soil. All 35c each: \$3.00 per 10.

S. bumalda (Anthony Waterer). Dwarf but erect form, growing about three feet high. Flowers bright crimson, in flattened heads at end of branches. Blooms about midsummer.

S. cantoniensis (S. reevesi; S. lanceolata). 8 ft. Medium-sized shrub with long narrow leaves. Flowers pure white, large, borne most profusely in dense heads. Practically evergreen.

S. van houttei. Garden hybrid. Moderate size. Branches arching and drooping with weight of flowers, which are borne so freely in spring as to cover plant completely with a mass of snowy bloom. Beautiful and extremely hardy.

Syringa. Lilac

Beautiful flowering shrubs which should be represented in every garden. Do well in all soils, extremely hardy.

S. vulgaris purpurea. COMMON PURPLE LILAC. The old, best known sort. 1½ to 2 ft. 50c each; \$4.00 per 10.

Symporicarpos (Snowberry)

S. orbiculatus (S. vulgaris). (Indian Currant; Red Fruited Snowberry). Habit compact. Loaded during fall and winter with a profuse crop of dark red, small berries in dense clusters. 1 to 1½ ft. 35c each; \$3.00 per 10.

DECIDUOUS ORNAMENTAL TREES

Should be more widely planted in California. California cities and towns are woefully deficient in shade trees along their streets and highways. A few dollars invested in shade trees will pay big dividends for several generations. Do something for future generations as past generations have for you.

Acacia

Albizzia Julibrissin. "Constantinople Acacia". 40-50 ft. A handsome shade and avenue tree highly adapted to California conditions. Fine feathery foliage, pink flowers in great profusion from July to October. Stands winter temperature of 12 degrees. Should be planted everywhere on the Pacific coast. 2 to 3 ft. 75c each; \$6.50 per 10. 1 to 2 ft. 50c each; \$4.00 per 10.

Acer. Maple

Norway Maple 3 $\frac{1}{4}$ ft. 75c.

Scarlet Maple 2 $\frac{1}{3}$ ft. 75c.

Negundo, Box Elder 1 $\frac{1}{2}$ |2 ft. 35c.

Aesculus, Horse-chestnut

1 foot 25 cents.

Betula. Birch

European White. Splendid lawn tree. Young branches droop 4|5 ft. 75c; 3 $\frac{1}{4}$ ft. 65c; 2 $\frac{1}{3}$ ft. 55c.

Canoe Birch. Paper white bark. Beautiful small tree. 4|5 ft. \$1.00; 3 $\frac{1}{4}$ ft. 75c. 2 $\frac{1}{3}$ ft. 65c.

Castanea. Chestnut

Italian Spanish 4|5 ft. \$1.50. Bears sweet nuts.

Catalpa Speciosa

Very hardy, rapid growth. 3 $\frac{1}{4}$ ft. 50c.

Cercis Judas Tree on Red Bud

Small tree with red pea shaped flowers in great profusion. 2 $\frac{1}{3}$ ft. 50c.

Crataegus. Thorn; Hawthorn

Without doubt the handsomest deciduous flowering tree. Of small size and fine habit. The double flowing varieties are a glorious sight in May. If the flowers were inconspicuous, the bright red berries in fall and winter would warrant planting this tree.

C. Monogyna or Oxyacantha, English Hawthorn or Maythorn. Double pink. Double red. Double white flowers, followed by profusion of bright red berries. 4|5 ft. \$2.00; 3 $\frac{1}{4}$ ft. \$1.75; 2 $\frac{1}{3}$ ft. \$1.50.

Be sure and include one in your planting.

C. Oxyacantha. Single white flowers, finely cut leaves. Small tree. 4|6 ft. \$1.00; 3 $\frac{1}{4}$ ft. 75c; 2 $\frac{1}{3}$ ft. 50c.

Laburnum

L. vulgare. GOLDEN CHAIN. 20 ft. Beautiful small tree, quick growth. Leaves soft, pleasing green. Flowers fragrant, bright yellow, in long, drooping racemes, suggestive of yellow Wistarias. 1 $\frac{1}{2}$ to 2 ft. 25c; \$2.00 per 10; \$17.50 per 100. Can be grown as a shrub.

Liquidambar

L. styraciflora. SWEET GUM. 120 ft. Forms large tree, but of slow growth. Leaves star shaped, similar to Maple. The autumn coloring is most gorgeous, surpassing that of any other tree. 1 to 2 ft. 50c each.

Liriodendron

L. tulipifera. TULIP TREE. 100 ft. Leaves large, rich green. Flowers handsome, cup-shaped, resembling a Tulip; greenish yellow, marked with orange inside. A magnificent tree. 2 to 3 ft. 75c each.

Robinia. Locust

R. pseudacacia. COMMON or BLACK LOCUST. 80 ft. Extremely rapid growth. The flowers white, very fragrant. Will flourish where no other tree will succeed. Bare root. 6 to 8 ft. 75c each; \$6.50 per 10; 3 $\frac{1}{4}$ ft. 50c each; \$4.00 per 10.

Sorbus

S. aucuparia. EUROPEAN MOUNTAIN ASH; ROWAN TREE. 40 ft. Handsome, small tree of erect growth. Flowers white, followed by large, red berries. Very handsome at any season. 1 $\frac{1}{2}$ |2 ft. 35c each.

Tilia. Linden

T. americana. AMERICAN LINDEN; BASSWOOD. Eastern U. S. 75 ft. Fine tree of rapid, erect growth when young, but ultimately forming a fine, broad, round head. Leaves large, light green. 6 to 8 ft. \$1.50 each; 4 to 6 ft. \$1.00 each; 3 to 4 ft. 75c each.

Ulmus. Elm

U. americana. AMERICAN or WHITE ELM. 120 ft. A magnificent tree. Growth is erect, with smaller branches drooping when old. Grows rapidly here. Bare root 8 to 10 ft., \$2.00 each; 6 to 8 ft., \$1.50 each. 4|6 ft. \$1.00 each.

Corylus. Filbert

Besides being a profitable orchard crop the filbert makes an attractive ornamental plant, when grown as small tree or shrub. (See opposite page).

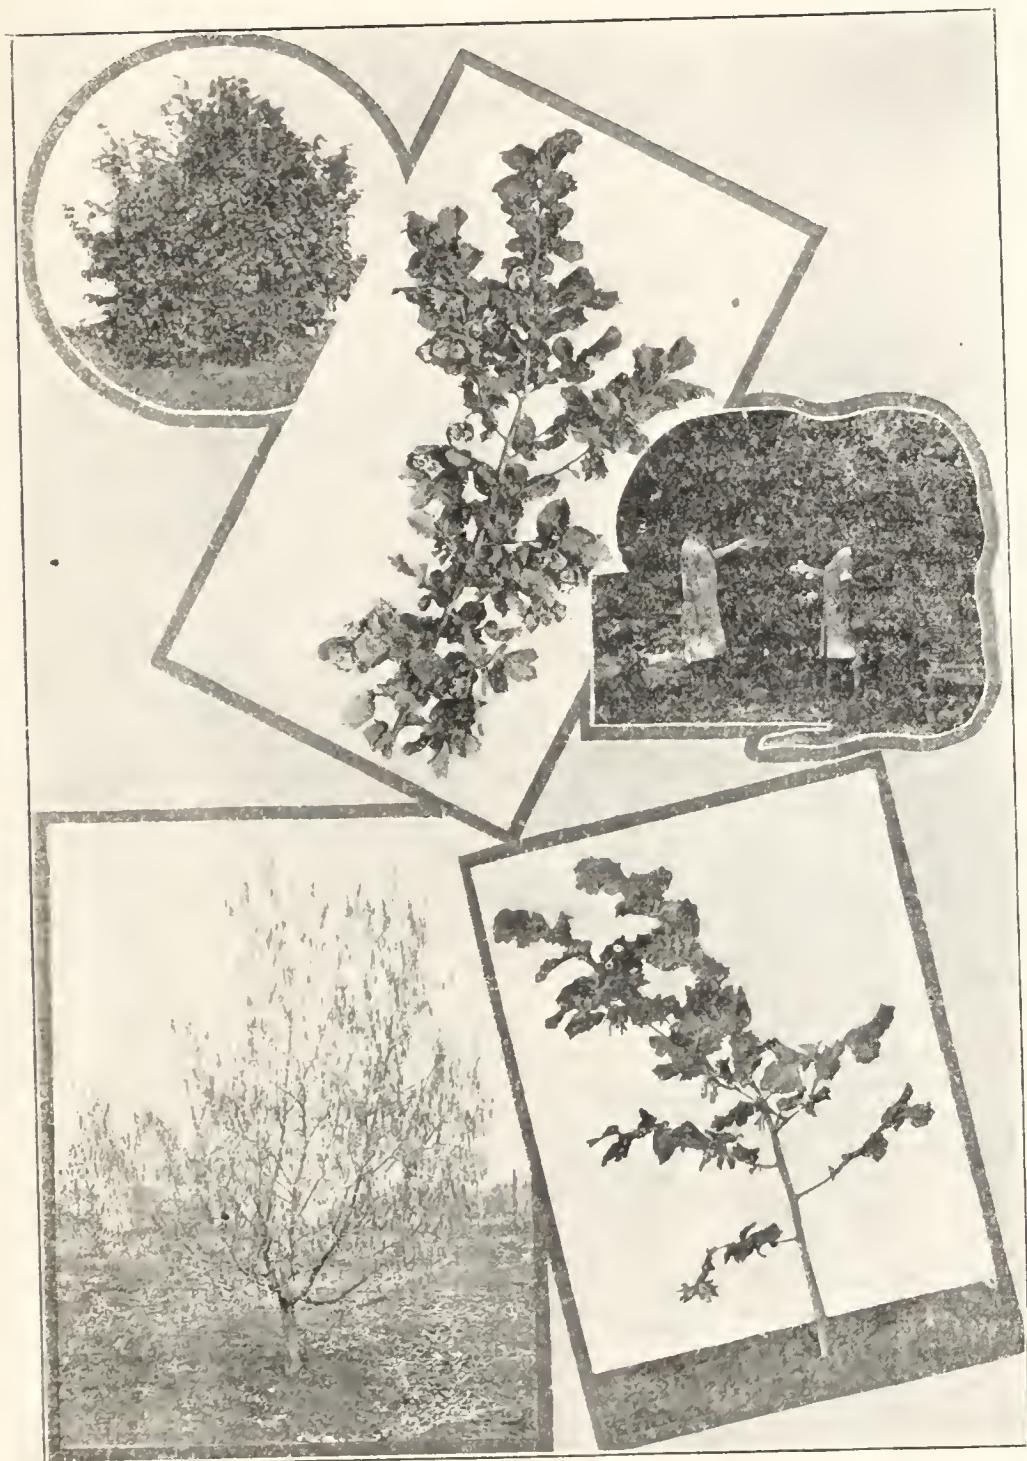

The Purple Leaf variety is especially decorative and always admired.

An attractive shrub that bears delicious nuts should be included in every planting. It is easily grown and not attacked by insect pests.

For full description and prices see page three. We can also supply bushy bearing plants of green leaf varieties at \$2.50 each.

The Filbert As An Ornamental

A HARDY NUT BEARING SHRUB

UPPER LEFT—Untrained shrub, in full sun.

UPPER CENTER—Fruiting branch showing nuts.

UPPER RIGHT—As shrub in full shade.

LOWER LEFT—Tree form for lawn specimen. Note beauty of mid-winter bloom.

LOWER RIGHT—Tree form in nursery now. Note nuts and catkins.

See opposite page.

BROAD-LEAVED EVERGREENS

Home grounds are greatly improved by use of these evergreens. For planting around the base of dwellings at entrance walk, in corners and on the lawn they are effective both summer and winter. See page ? for suggestions.

We group what are ordinarily called "Broad-Leaved Evergreens" to distinguish them from conifers. They vary in size from the largest trees to the smallest shrubs, but all included here are hard-wooded plants. Balled plants, are shipped with the earth wrapped in burlap. Do not remove it. Plant burlap and all, cutting the top string, but allow the burlap to remain, otherwise the ball might break, causing the loss of the plant.

(S) means shrub. (T) means tree.

Abelia

A. grandiflora. (S) 6 ft. Free-flowering with small, glossy leaves. Flowers an inch long, white flushed pink. Blooms profusely and continuously all summer. 75c each.

Acacia

Flowering trees or shrubs of widely varying habit, appearance and foliage. Flowers are always some shade of yellow. Potted 75c each; \$6.00 per 10.

A. baileyana. (T) 30 ft. One of the very best. Growth extremely rapid. Intensely glaucous throughout the year. Leaves feathery.

Flowers early in the utmost profusion, deep golden yellow. A magnificent species.

A. dealbata (A. mollissima). SILVER WATTLE. (T) 50 ft. Probably the most popular Acacia in California. Prized for its wonderful freedom of bloom in late winter or early spring. Foliage feathery, varies silvery to green. Flowers clear yellow, very fragrant.

Decurrens. "Green Wattle". Grows rapidly into a large, erect tree suited to parks and avenues.

Arbutus

A. unedo. STRAWBERRY TREE. (S) 10 ft. Moderate-sized shrub, attractive foliage. White flowers in winter months and with them the large, red, strawberry-like fruits of previous season. Very showy and handsome. Pots 24|30 inch \$2.00 each.

A. Menziesi. (Madrone) Pacific Coast. (T). Beautiful and distinct native tree. Smooth, ruddy brown bark. White flowers followed by orange red berries. Potted, small plants 50c each.

Aucuba

A. japonica. GOLD DUST PLANT. (S) 4-10 ft. Leaves almost covered with yellow dots, accounting for the common name. Excellent for tub culture or planting out. Bushy plants, potted. 4 in pot, 75c each.

Buddleia

B. superba. 8 ft. Tall shrub with arching branches; leaves long and narrow; flowers in drooping panicles; color a bright rose lilac with orange eye; blooms in fall. 85c each.

Buxus. Box

B. sempervirens. BOXWOOD. (S) 5-10 ft. Handsome shrub, compact growth. Leaves small, deep green. Used for low, formal hedges. Also trained into various forms such as round-headed standards, pyramids, globes, etc. Can be kept at any size and trimmed into any shape. Cone-shaped, balled, 1 to 1½ ft. \$3.00 each. Globe-shaped, balled, 2 to 2½ ft. \$4.00 each; 3-inch pots, 20c each; \$1.50 per ten; \$12.50 per 100.

Coprosma

C. baueri. (S) Low-grading shrub, or can be trained up as a low climber. Leaves are rounded, green and wonderfully glossy; dust will not stick to them. Flowers are inconspicuous, followed by clusters of showy, yellow berries. Pots, 1 to 1½ ft. 55c each; \$8.00 per 10.

Cornus. Dogwood

C. capitata (Benthamia fragifera). EVERGREEN DOGWOOD. (S) 15 ft. Splendid shrub, rather large size. Large flowers are cream colored, becoming ruddy before falling, followed by large, red, showy fruits. Potted, 1½ to 2 ft., \$1.25 each. \$10.00 per ten.

Cotoneaster

Handsome shrubs; leaves small, glossy and of varying shades of green; flowers minute, usually white or pinkish; berries of many hues and colors varying from orange to bright scarlet. Unexcelled for grouping, corner effects and for edging large plantings of shrubbery borders.

C. horizontalis. (S) 2 ft. One of the best trailing shrubs. Branches grow almost on the ground. Leaves very small and turn red during winter. Flowers pinkish white. Berries bright red in great profusion. Balled, 1 to 1½ ft. \$1.50 each.

C. Franchetii. 8 ft. A handsome shrub well meriting its popularity. Upright growth; branches arching; throughout the winter bears numerous small pink flowers. Berries yellowish red. Potted, gallon containers, 1½ to 2 ft. \$1.25; 4 in. pots, 1½ to 2 ft. 75c each.

Cotoneaster microphylla. 4 ft. Low growing dense shrub, small round leaves, shining dark green. Berries bright red, borne along the stem. Potted, 1 to 2 ft. \$1.00 each.

Evonymus

The evergreen sorts are grown for their very handsome foliage, which varies considerably and includes many variegated forms. In some parts of the State they bloom and bear heavy crops of curiously formed, showy, red and orange berries during fall and winter. No collection of plants nor landscape effect is quite complete without one or more of these beautiful plants in evidence. Admirably useful and attractive when used in groups, edgings, hedges, corner plantings and in rockeries.

E. japonicus albo marginatus. SILVER-MARGINED EVONYMUS. (S) 5 ft. Leaves have a very narrow margin of silvery white. Growth slow and compact. Entirely distinct. 8|10 inch, 35c each.

E. japonicus aureo variegatus. GOLDEN VARIEGATED EVONYMUS. Branches green; leaves yellow in center, dark green around edges. Color about equally divided. Often sends out branches with green leaves. Balled, 10-12 inch. 75c each.

Genista. Broom

A fast growing group of shrubs which brighten up the landscape with their brilliant masses of yellow peashaped flowers; valuable as a contrast to solid green shrubbery; unusually hardy and drought resistant.

G. scoparins. "Scotch Broom". Europe. 6 ft. A very fast growing, erect, bushy shrub with minute leaves and large, yellow, pea-shaped flowers, borne in great profusion in the springn. 3 to 4 ft. 75c; \$5.00 per 10; 2 to 3 ft. 50c; \$3.50 per 10; 4 in. pots. 1 to 1½ ft. 35c; \$2.50 per 10; 100 lts 10c less.

Ginkgo. Maiden Hair Tree.

G. biloba (*Salisburia adiantifolia*). 60 ft. One of the most remarkable trees in cultivation. Leaves fan-shaped, clear green during summer, clear, soft yellow in the fall. Has been preserved from antiquity in grounds about the temples of China and Japan. Potted, 6-12 in. 50c each.

Hydrangea

Hydrangea hortensis. 8 ft. A popular garden plant or shrub with large foliage and immense heads of light pink flowers, having a tinge of blue when grown in soils containing iron. 4 inch pots 50c each.

Ilex. Holly

Holly prefers a moist and partially shaded situation, which enhances the luster and brilliancy of foliage and berries.

I. aquifolium. ENGLISH HOLLY. (T) 40 ft. Berry bearing, grafted plants. Well-known, small tree with leathery, dark green, prickly leaves. Requires plenty of moisture. Balled, 3 to 4 ft. \$5.00 each; Seedling plants, Balled, 12-18 inches \$1.75 each. Potted 8-12 inches 75c each; \$6.00 per 10; \$50.00 per 100.

Ligustrum. Privet

Flourish in most any soil and situation. Suitable for grouping, massing and hedges.

L. nepalense. "Evergreen Privet". Leaves small and dark green. Seedlings 10-12 inches \$5.00 per 100.

L. ovalifolium. "California Privet". Esteemed for hedge plants. Forms a compact hedge by occasional pruning; of easy culture. Potted, gallon containers, 1½ to 2 ft. 35c each.

See Hedge Plants also.

L. ovalifolium aurea marginatum. Variety of ovalifolium with yellow variegations. 6-12 inch 25c each; 4 ft. \$1.50 each.

Mahonia

M. aquifolium. OREGON GRAPE. (S) 6 ft. Native shrub, medium size, dark green leaves, coppery purple during winter. New growth very glossy. Flowers bright yellow. 1 foot 35c each; \$3.00 per 10.

Parkinsonia Jerusalem Thorn

P. aculeata. Showy ornamental tree. Bark bright green; foliage feathery. Handsome tree at all times with an abundance of handsome yellow flowers. Thrives in dry soils, medium hardy. Potted, 10-15 in. heights 50c.

Photinia

P. arbutifolia. TOYON; CHRISTMAS BERRY; CALIFORNIA HOLLY. 25 ft. Well-known native shrub, brilliant red berries. Thrives admirably under cultivation. 3 in. Pots. 50c each. 4 in. Pots 75c.

Prunus

P. laurocerasus latifolia. ENGLISH LAUREL; CHERRY LAUREL. (S) 15 ft. Small tree or bush. Glossy, evergreen foliage, beautiful both summer and winter. Can be planted as single specimen or in pairs at gates or entrances. Potted, 75c and \$1.00.

P. Insitanica. PORTUGAL LAUREL (S) 20 ft. Somber, very dark green leaves. Growth compact. Flowers white. One of the handsomest evergreen shrubs for tub culture. Potted, 60c each.

Pyracantha (Crataegus) Evergreen Hawthorn

P. coccinea lalandi. (S) 20 ft. Of strong growth, making long shoots that can be trained against a wall if desired. Berries orange yellow. Balled, 1½ to 2 ft. \$1.50 each. 1 to 1½ ft. 75c.

P. crenulata. CHINESE EVERGREEN HAWTHORN. (S) 10 ft. Very distinct. Growth is compact, branches slender. The earliest red-berry-bearing shrub, color fully developed by August. Endures considerable shade. Potted, 1½/2 ft. \$1.50 each.

P. crenulata yunnanensis. Splendid form of preceding; growth prostrate and more vigorous; foliage larger and glossy; flowers white and followed by masses of large bright red berries, which remain on the plant until early spring. Excellent for general ornamental planting; birds do not molest the fruit. Potted 1½ ft. 75c.

Rhamnus

R. californica (Cascara; California Wild Coffee.) (S.) Handsome, hardy native shrub. Leaves green, oblong, glossy, aromatic when crushed. Flowers greenish. Berries shaped like those of coffee, red turning black. Thrives well in shade. Balled, 1½ to 2 ft. 60c; 2 to 3 ft. \$1.00.

Viburnum

Universal favorites used in garden making; thrive in any soil and situation. For borders, aligning walks, and driveways. Handsome as single specimens on lawns.

V. tinus. (Laurustinus.) (S.) Shrub with rather small, wavy-margined, pointed leaves. Flowers in broad heads, pinkish in the bud, white when fully opened. A great hedge plant. 4 inch Pots, 50c each.

CONIFEROUS EVERGREENS

Abies. Fir

A. concolor. WHITE FIR. Very beautiful fir; conspicuous on account of its nearly white bark. Growth very regular and symmetrical. Very resistant to drought and heat. 2 to 3 ft. \$3.00 each. 1½ ft. \$2.00 each.

Chamaecyparis

Trees valuable for garden and park purposes, and in the smaller sizes admirably adapted to porch and interior decorations. Habit varies from almost dwarfs to very large trees.

C. lawsoniana. LAWSON CYPRESS; PORT ORFORD CEDAR. 200 ft. Has elegant drooping branches and very slender, feathery branchlets. Potted 1|1½ ft. \$1.00 each.

C. Lawsoniana alumi. "Blue Lawson Cypress". Foliage a bluish, metallic hue; branches close and compact. Its color and symmetrical habit make it one of the most popular conifers. Balled. 1|1½ ft. \$2.50 each.

C. Lawsoniana argentea. "Silver Lawson Cypress". Graceful habit; foliage silvery; distinct and beautiful. Potted. 50c each.

C. Lawsoniana pendula. "Weeping Cypress". Beautiful tree for specimen planting. Graceful pendulous branches, lustrous silvery-green foliage. Potted 1|1½ ft. \$1.50 each.

C. Lawsoniana erecta viridis. Branchlets stand vertically and close together. Beautiful for individual planting. Balled. 1|1½ ft. \$2.50 each.

C. Lawsoniana Triumph de Boskoop. Of upright growth. Foliage intensely silvery. One of the best of the blue Lawsons. Balled. 1|1½ ft. \$2.50 each.

C. Lawsoniana lutea. GOLDEN CYPRESS. Very compact elegant graceful foliage. One of the best of the golden cypress. Balled, 10|12 inch \$2.50 each.

C. Nootkatensis. (Nootka Sound Cypress) Upright-growing tree, with spreading upward-curving branches and flexible branchlets. Foliage dark green. Somewhat resembles Lawson Cypress. Balled. 18|24 inches \$2.50.

Cryptomeria

C. Japonica elegans. 20 ft. Foliage fine and feathery, very compact; in summer a rich green, purplish bronze in winter. A very handsome small tree. Potted. 1½|2 ft. \$2.00 each.

Cupressus. Cypress

Tall or medium sized trees, usually of rapid, erect growth. They thrive in almost any good soil and are useful landscape material for quick and permanent effects.

Arizona. "Arizona Cypress". Beautiful bluish-green cypress of narrow, pyramidal form. Suitable to the hot dry sections of the interior. Potted. 12|18 inches 75c each.

Macrocarpa. "Monterey Cypress". Picturesque native California cypress. Widely planted for hedge, shade trees and wind-breaks. Quart containers: 1 to 2 ft. 35c each; 12|15 in. \$7.50 per 100.

MAC NABS CYPRESS. *Macnabiana*. Exceedingly rare in cultivation or in forest. A very beautiful low growing evergreen with reddish brown branchlets and silvery green foliage. Highly suited to rockeries or shallow ledgy ground. Grows quite rapidly. May be pruned to low compact form. If you are a tree lover, include one of these in your order. Potted or balled 6|12 inches 75c; 12|18 inches \$1.50; 18|24 inches \$2.00; 2|3 feet \$3.00. Larger specimens \$1.50 per foot.

Semperfivens. "Italian Cypress". Tall slender tree, erect branches, having columnar effect. Useful subject for gateways, arches, etc. Balled or potted, 3 to 7 ft. \$1.00 per foot.

C. Lusitanica. PORTUGAL CYPRESS. 40 ft. Very handsome, low growing tree; foliage silvery. Potted 1½|2 ft. \$1.75 each.

Juniperus. Junipers

The Junipers comprise a splendid collection of small trees. The growth varies from upright to spreading and trailing habit.

Stock this season mostly 6|12 inch plants. Growth is rapid, soon giving desired effect.

Chinensis Pfitzeriana. "Pfitzers Juniper". Very graceful habit; rather low growing, spreading branches; foliage sagegreen. Potted 50c each.

Chinensis. Handsome perfectly hardy Juniper. Compact pyramidal habit. Potted, 35c each.

Virginiana. "Red or Virginia Cedar". Conical form, densely branched thickly foliated in deep rich green; valuable for formal work. Potted, 60c each.

Excelsa. "Greek Juniper". Very ornamental. Decidedly conical in form, densely clothed with blue foliage. A distinct species of great beauty. 50c each.

Libocedrus. Incense Cedar

INCENSE CEDAR. (*Libocedrus decurrens*). Small specimens and full grown trees are beautiful. Glossy green foliage, sheds dust. Forms a perfect cone. No more satisfactory evergreen for California conditions. Grows rapidly. Balled. 1|1½ ft. \$1.00; 1½|2 ft. \$1.25; 2|3 ft. \$2.50; 3|4 ft. \$3.50; 4|5 ft. \$5.00.

This cedar is best evergreen for orchard windbreaks. For this purpose 6|8 inch plants, bare roots \$10.00 per 100.

Stands drought, heat and frost.

Picea. Spruce

P. Douglassi. DOUGLAS SPRUCE. OREGON PINE. Excepting the Sequoias, our most gigantic tree. Growth erect and very rapid. Very symmetrical. Foliage very soft and rich, dark green. Balled, 2 to 3 ft., \$2.50 each; 1 to 2 ft. \$1.50; Potted \$1.00 each.

P. Pungens. Colorado Blue Spruce. Beautiful compact habit, soft bluish foliage. Very striking as lawn specimen. Balled. 1 ft. \$1.00 each.

Pinus. Pine

P. Canariensis. CANARY ISLAND PINE
One of the most beautiful pines. The long leaves, eight to twelve inches in length, are gathered into large tufts all over the tree, giving it decided individuality. Potted, 2 ft. \$1.00 each.

P. Lambertiana. LAMBERT'S SUGAR PINE. Desirable for home grounds when afforded sufficient space. Leaves bluish glaucous green, clustered towards the ends of the branches; cones 15 to 20 inches long; seeds large and edible. 1½ ft. \$1.75 each; 1½ ft. \$1.50 each.

P. ponderosa. WESTERN YELLOW PINE. Stout, spreading branches, forming a narrow spire-like head. Leaves long, dark green. Balled, 1½ to 2 ft. \$1.00 each.

P. Subiriana. Gray or Digger Pine. Handsome quick growing pine, with long gray needles. Stands drought and heat. Inform us cones with edible nuts are borne when quite young. Balled, 1 2 ft. \$2.00; 2 3 ft. \$2.75.

Retinispora

Squarrosa. "Veitch's Silver Cypress". Low, dense shrub, feathery, spreading branches, foliage silvery blue. One of the most beautiful of the Japanese Cypress. Balled, 10 to 12 inch \$2.00.

Plumosa aurea. "Golden Plumed Cypress". Small dwarf spreading tree; foliage plump and graceful; terminal growths and foliage, bright yellow. Balled, 1 to 1½ ft., \$2.25 each.

Sequoia

S. sempervirens. CALIFORNIA REDWOOD. Rapid growth, tapering pyramidal habit. Does well in all parts of California. Makes beautiful avenue or specimen tree. 8½ inches, 50c each.

Taxus. Yew

Taxus Brevifolia Nuttali. Western Yew. Beautiful spreading branches, rich dark green foliage. Its irregular growth, drooping branches and coral red berries makes this a most interesting tree. Will grow in shade of larger trees. Very rare in cultivation. Will add distinction to your grounds, potted 1 1½ ft. \$1; 1½ ft. \$2

Thuya. Arbor Vitae

A group of very useful, hardy evergreens, thriving in a wide variety of soils and exposures. Many of the formal sorts are successfully used in producing architectural effects. As tub plants they are durable and attractive.

T. Orientalis aurea nana. "Berckman's Dwarf Evergold Arborvitae". 6 ft dwarf habit, compact and symmetrical; branchlets are flattened, tips of which retain their golden tint throughout the year. Wonderfully effective plant for tub or lawn. This is the most popular variety in our entire list of conifers. Balled, bushy specimen plants 15 to 18 in. \$2.50; 6 to 10 inches 75c.

T. Occidentalis. AMERICAN ARBOR VITAE A tree of varying heights; foliage bright green, yellow green beneath. Valuable as a tub plant and as specimens in formal gardening. Balled, 3 to 4 ft. \$4 each.

Roses

Whil we do not offer such a long list as some, we have selected very choice varieties of various shades and colorings.

Those marked POT'S are from 2½ inch and 3 inch Pots, averaging about 1 foot high. These pot grown plants enable you to buy choice sorts at very low prices. H. T. means Hybrid Tea. T. means Tea.

Dean Hole. Silvery carmine, shaded salmon. Buds enormous and very long pointed, opening into a mammoth flower. Growth strong. Pots 25c.

Edward Mawley. H. T. A very dark velvety crimson, flowers are globular in the bud opening into immense blooms. One of the best of the dark red Hybrid Teas. 50c each. Pots 25c.

General McArthur. H. T. Remarkably strong growth; good habit; blooms continuously and profusely; flowers large and fragrant; the bud and open flower are brightest crimson and retain their coloring until they drop their petals. 50c each.

Irish Elegance. A most vigorous grower, and profuse bloomer. The long pointed buds are deep madder orange, splashed with crimson, expanding to large single flowers of rich, satiny old gold. 65c each.

Joukheer J. L. Mock. H. T. One of the best bedding and cutting varieties. Flowers with the greatest freedom on long stiff stems, large size and perfect form, deep pink, the outside of the petals silvery rose white. 50c. Pots 25c.

Killarney. H. Flesh, suffused pink. Semi-double. Buds long pointed and very beautiful. Free blooming. Very fragrant. 50 cents.

Lady Battersea. H. T. A popular rose of unusual coloring; the long, graceful buds, are full and pointed. Beautiful cherry pink, permeated with an orange shade. 50c. Pots 25c.

Lady Hillingdon. T. Beautiful, long, slender buds opening into flowers of brilliant golden-yellow with no markings of any other color. Blooms continuously. 50c. Pots 25c.

Los Angeles. Per. The ideal American garden rose, one of the finest varieties ever introduced. It has gained international recognition as the peak of excellence by its remarkable adaptation to all climates. A glorious rich flame-pink, shaded golden yellow. A rose for everybody, everywhere. 75c.

Maman Cochet. T. One of the most popular of the older roses; clear, rich pink; large, full and of perfect form; free blooming, every shoot being crowned with a flower bud; a vigorous grower with handsome foliage. 50c. Pots 25c.

Mme. Butterfly. H. T. This new and splendid sport of Ophelia resembles its popular parent in general characteristics. Has deep shadings of apricot and gold on a background of brilliant pink. The plant is very vigorous and fine in habit. 65c.

Mrs. George Shawyer. T. One of the best pink roses for cutting; color a bright peach-pink; buds long and well formed; carried on very long stems. 50c. Pots 25c.

Miss Lolita Armour. Per. One of the most striking color combinations ever seen in a rose. As the flowers expand, they develop to a deep coral red with a golden coppery-red suffusion, the base of the petals being a rich golden-yellow with coppery sheen. The flower is very double and cup shaped, and the vigorous plants are a continual mass of brilliant bloom. Pots 35c.

Orleans. A polyantha rose of dwarf habit. Fine for budding or massing. Geranium red flowers in great profusion. Pots 25c.

Paul Neyron. H. P. The largest rose in cultivation; a handsome upright grower, producing an immense flower at the end of every long stiff stem; color, a deep rose; a free bloomer. Pots 25c.

Climbing Roses

Dorothy Perkins. Wichuriana. Noted for its hardiness and vigorous habit of growth, beautiful color and freedom of bloom; the flowers are borne in large clusters; a beautiful shell-pink color; suitable for situations where a trailing rose is desired. 50c. Pots 25.

FERNS, HOUSE PLANTS, PALMS, GRASSES

Ferns

All from 3 inch pots, 35c each.

Asparagus Plumosus. LACE FERN. This graceful fern has foliage finer and more delicate than that of any other, and lasts for weeks after being cut. An excellent house plant succeeding under almost any condition.

Asparagus Sprengerii (EMERALD FATHER FERN) Especially useful to grow as a pot plant for decorative purposes, or for planting in suspended baskets. The feathery sprays are frequently four feet long, and of a rich shade of green.

Nephrolepis "Roosevelt" Beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other fern; as the plant ages this effect becomes quite distinct.

Nephrolepis Whitmanii. Fronds beautifully plumed and crested; of most exquisite beauty.

Nephrolepis John Wanamaker. With long, narrow, gracefully drooping fronds. It is a rapid grower, making an abundance of fronds.

Woodwardia Ferns (Not potted). One of the strongest tall-growing ferns. In partly shaded corners there is nothing more pleasant to the eye than a large, beautiful fern, with long, wavy green fronds, 6 to 12 inches wide, and from 4 to 8 feet long, growing as freely as they grow in the woods. Large roots, 50c each.

Sansevieria Zeylanica

Ideal decorative plant; standing more hardship and abuse than any other house plant. Leaves thick and leathery; not affected by gas, dust or heat. Grows to a length of three to four feet; beautifully striped crosswise of leaves with broad white variegations on a dark green ground. 3-inch pots 35c each.

Climbing Cecile Brunner. Polyantha. A vigorous climber which may be held in the bush form by pruning. An exact counterpart of the great favorite, Mlle. Cecil Brunner, except that it is a much more robust grower. Always in bloom; flowers perfectly, double, rosy pink, petals in bud daintily reflected. Delightfully fragrant and in every respect a most exquisite rose. 50c. Pots 25c.

Excelsa. (Red Dorothy Perkins.) An intense crimson, produced in immense clusters. Glossy foliage. Pots 25c.

Silver Moon. Hybrid Wichuraiana. One of the most satisfactory and indispensable climbing roses. This extraordinary climber is covered with rich dark green foliage, a fitting background for the large semi-double white and creamy flowers, often four inches in diameter, that are borne in great profusion. 50c.

Sunburst. Hybrid Tea. Yellow, shaded coppery orange, outer petals lighter. It is large, magnificently formed and richly Tea scented. Form is long and cup shaped when fully expanded. Pots 25c.

Palms

W. filifera. (California Weeping Palm). Trunk attains diameter of four feet; leaves fan-shaped, with numerous divisions and whitish filaments. Potted 1 to 1½ ft. 60c each.

Cordyline australis (Dracaena australis; D. indivisa). 30 ft. Tropical looking trees with sword-shaped leaves, large panicles white flowers. Often called "Dracaena Palm". 1 foot 75c each. 1½|2 ft. \$1.00 each.

Bamboo

Hardy variety growing 10-12 feet tall. Strong clumps, 75c each.

Pampas Grass

A showy and very ornamental grass with feathery white plumes. Strong clumps. \$1.00 each.

Red Hot Poker

Tritoma Pfitzeri. "Red Hot Poker". An easily grown perennial, producing spikes 3 to 4 ft. high surmounted by blooming heads of rich orange scarlet. Divisions 50c each; \$4.00 per ten.

Shasta Daisy

Well known low growing hardy plants. Large white flowers on slender stems. Small plants 60c a dozen; \$4.00 per 100.

Plumbago Larpentae. (Lead-wort). Attractive edging plant of evenly rounded dense growth, 12 inches high. The tiny leaves of apple green are a rich setting for spiky red buds, and clusters of phlox-like blue flowers late in summer. 3 inch pots 35c each.

THYME. Makes pretty edging and rock plant. Leaves fine for flavoring. Balled clumps 50c.

Climbing and Trailing Plants

Of wide use and add much to the beauty of California home plant adornment. Do well in most any good garden soil. Their grateful shade on porch and their beautiful foliage and flowers on pergolas, fences and coverings for unsightly objects lend a charm to the garden that is to be attained by no other class of plants.

Ampelopsis

Well-known deciduous vines climbing by tendrils. All assume most gorgeous autumnal tints, Virginia Creeper first and Boston Ivy later. Both types are extremely hardy.

A. quinquefolia. VIRGINIA CREEPER; WOODBINE. Very well-known. Leaves large with five leaflets. Berries dark purple. Foliage most intense scarlet early in the fall. In 3-inch pots, 50c each; \$4.00 per ten.

A. tricuspidata (*A. veitchii*). BOSTON IVY; JAPAN IVY. Distinct from Virginia Creeper. Foliage is dense and very glossy. Tendrils furnished with small discs, which adhere tenaciously to brick, stone or even wood, turns yellow and red in fall later than Virginia Creeper and persists longer. In 3-inch pots 50c each; \$4.00 per ten.

Bignonia Trumpet Flower

B. Radicans. (Trumpet Flower). A robust woody vine; twining tightly with numerous roots along stems. Its orange scarlet, trumpet-shaped flowers cluster at tip of branches. Leaves light green. Will climb to great heights on trunks of trees, and for every purpose is one of the best vines. 1 year 25c each; \$2.00 per ten.

Clematis

Grand for pillars and trellises or may be pegged down for ground cover. Give them rich soil and full sun.

C. paniculata. Flowers white, fragrant, very small, borne in the greatest profusion during late summer. 4-inch pots, 75c each; \$6.50 per ten.

Fence Posts

GROW YOUR OWN. By planting our Black Locust seedlings in some unused corner of the farm 3 to 6 feet apart. Or plant along that fence which will soon need new posts. They will make good posts, and never need renewing.

	1 1/2 ft.	1 1/2 ft.	2 ft.	2 3 ft.	3 4 ft.
100 . . .	\$5.00	\$6.00	\$7.50	\$10.90	
1000 . . .	35.00	45.00	55.00	80.00	

Large Flowering Varieties

Jackmanni. Single, medium-sized; intense violet purple. Very free bloomer. The more popular variety grown. \$1.25 each.

Dolichos

D. lignacis. AUSTRALIAN PEA VINE. Handsome and popular climber. Bears a profusion of fragrant, purple rose flowers in upright racemes, greatly resembling miniature Sweet Peas. Blooms from late winter to midsummer. In 3-inch pots, 35c each; \$2.50 per 10.

Hedera. Ivy

Valuable for covering walls, trunks of trees, for screens and hanging baskets. Make a handsome evergreen carpet under trees; may be used to advantage for borders of shrubberies.

H. helix. ENGLISH IVY. Very dark green, leathery leaves. Old vines have greenish flowers and black berries in clusters. In 4-inch pots 50c each; 3-inch pots 40c each.

Lonicera. Honeysuckle

Popular free-blooming vines, hardy, growing well in all sections of the coast, as coverings for porches, pergolas, fences and unsightly objects. Require little or no attention and afford a dense shade.

L. japonica Halliana. JAPANESE HONEYSUCKLE. Growth strong and dense. Leaves are bright green above, grayish green below, not at all purplish. Flowers, white, changing to yellow. Very fragrant. 3-inch pots 35c each; \$3.00 per ten.

Wistaria

Handsome for use on pergolas, porches and trellises; attractive foliage, magnificent drooping clusters of pea-shaped flowers.

W. Sinen-is. Blue. Panicles about 12 inches long. 1 year 50c; \$4.00 per ten.

Orange and Lemon Trees

Some of our Eastern customers order citrus trees for their conservatory or as house plants, so we list the following varieties and will send postpaid to any point in the United States select trees, one year old, with roots packed in moss for \$2.50 each. Tops will be cut back ready for planting.

ORANGES. Washington Navel, Valen-cit.

LEMONS. Eureka, Ponderosa.

GRAPE FRUIT. Marsh Seedless.
